What's New in Simcenter 3D 2019.2 Correlation

Unrestricted © Siemens AG 2019

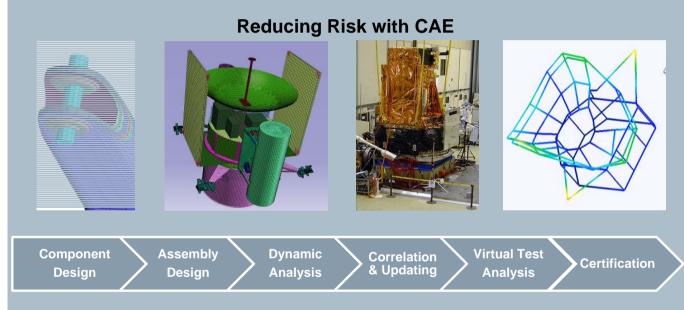

Realize innovation.

## SIEMENS Ingenuity for life

## **Using Simcenter 3D and Simcenter Testlab to Validate Designs**

**Correlation, Updating & Virtual testing** 

- Standardize on Simcenter 3D and Simcenter Nastran for dynamic simulation
- Correlate analysis results with physical testing using Simcenter Testlab and Simcenter 3D FE Model Correlation
- Update the simulation using Simcenter 3D FE Model Updating
- Perform virtual testing using validated simulation
- Promotes faster development with reduced risk

## 2019.2 FE Model Correlation and Updating

## Migration of Virtual.Lab Correlation & Updating functionality to Simcenter 3D

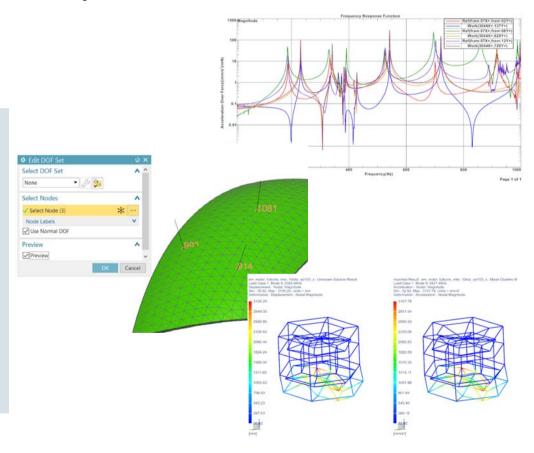

Focus of 2019.2 release:

Correlation and Pre-Test

## **Workflow and performance improvements**

### **Enhancements in 2019.2 FE Model Correlation**

- FRF Correlation
- Correlation of symmetric models
- Wireframe display of work mode shapes
- Automatic/Manual loading of mode shapes
- Automatic pre-test wireframe generation
- Automatic face normal DOF selection
- New Test Analysis Reference Solution
- Interface with Simcenter Testlab

**Unrestricted © Siemens AG 2019** 

Page 3 Siemens PLM Software

## Simcenter 3D FE Model Correlation Enhancement: FRF Correlation

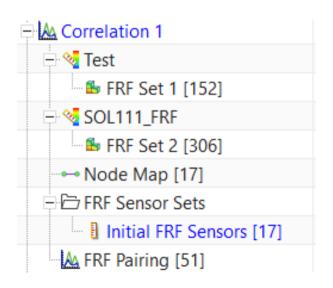

### **New FRF Correlation Solution**

- Compare Test (Reference) and Analysis (Work) FRFs
- Supported FRF Analysis Solutions
  - SOL 111 FRF, SOL 108 FRF
  - Simcenter and MSC Nastran
- Supported FRF Test formats
  - UNV, LMS
- Supported Measurements
  - Displacement/Force
  - Velocity/Force
  - Acceleration/Force

### **Benefits**

- Directly correlate Test FRFs with Analysis
  - No need to curve-fit and extract modal data
  - Assess mass and stiffness trends
  - Evaluate impact of damping

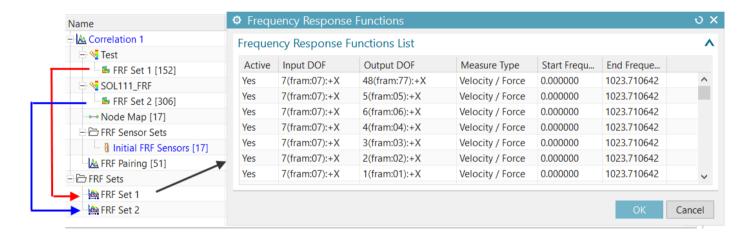

Page 4 Siemens PLM Software

## Simcenter 3D FE Model Correlation Enhancement: FRF Correlation

#### **New FRF Correlation Solution**

Test and Analysis FRFs are stored in FRF Sets

#### **Benefits**

Common data management with other applications

Page 5 Siemens PLM Software

## Simcenter 3D FE Model Correlation Enhancement: FRF Correlation

# SIEMENS Ingenuity for life

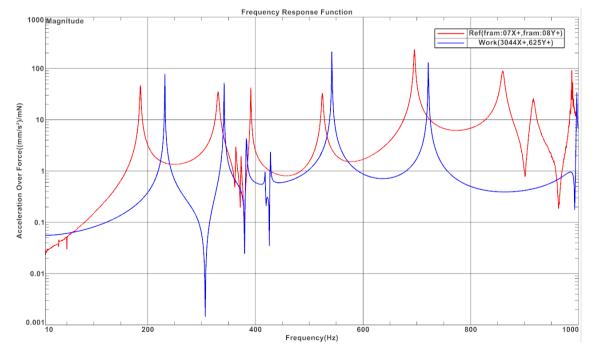

#### **New FRF Correlation Solution**

- FRF pairing based on node map
  - Proximity-based
  - Can be edited
- XY Plots of
  - Work FRFs
  - Reference FRFs
  - Overlays of Work and Reference FRFs
- Optional operations
  - RSS Sum
  - RMS Average

#### **Benefit**

 Visual comparison of single or multiple Test and Analysis FRFs

| Correlation Details View |          |          |              |       |                       |           |            |                  | ^ |
|--------------------------|----------|----------|--------------|-------|-----------------------|-----------|------------|------------------|---|
| Pair                     | [Ref] In | [Ref] In | [Ref] Out. N | [Ref] | [Ref] Function        | [Work] In | [Work] Out | Out./In. Measure |   |

# Simcenter 3D FE Model Correlation Enhancement: Correlation of Symmetric Models

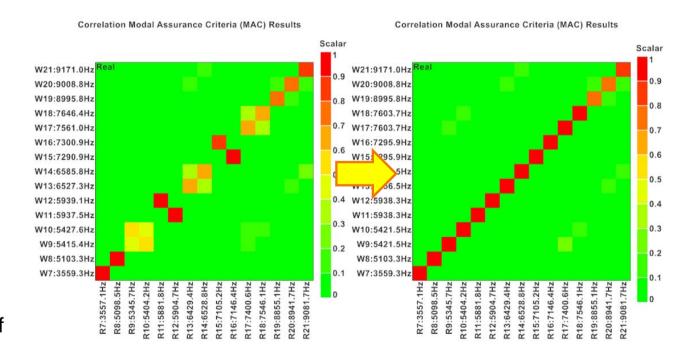

## Repeated modes of Symmetric Structures

- Symmetric structures exhibit repeated modes with identical or closely spaced natural frequencies
- The symmetry can be either cyclic or with respect to one or more axes
- A method is provided that operates on clusters of test and analysis repeated modes

#### **Benefit**

 Provide accurate correlation metrics of symmetric structures like wheels and rotors

**Unrestricted © Siemens AG 2019** 

Page 7 Siemens PLM Software

# Simcenter 3D FE Model Correlation Enhancement: Correlation of Symmetric Models

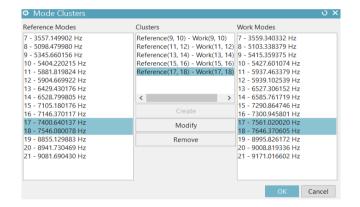

## Ingenuity for life

**SIEMENS** 

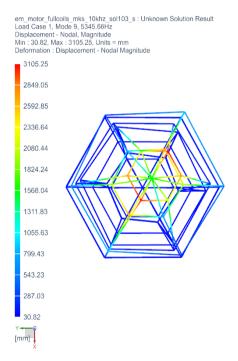

## **Defining Mode Clusters**

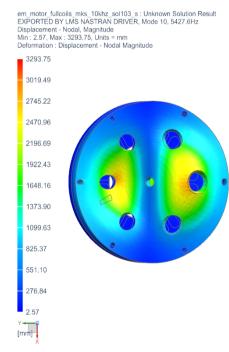

You define clusters of Reference and Work repeated

modes

 The software recomputes the clustered Work mode shapes, effectively rotating them to match the Reference mode shapes

### **Benefits**

MAC metric reflects the similarity of the mode shapes

Unrestricted © Siemens AG 2019

Page 8 Siemens PLM Software

## Simcenter 3D FE Model Correlation

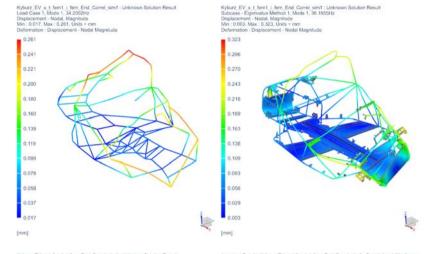

## **Enhancement: Wireframe display of work mode shapes**

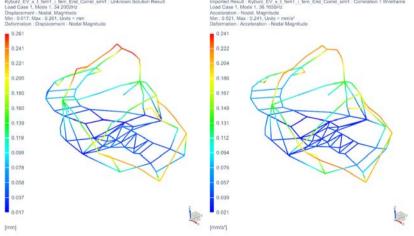

## Wireframe Work Mode Shape Display

- Software optionally displays
   Analysis mode shapes on the Test
   wireframe
  - Using the Correlation node map

### **Benefits**

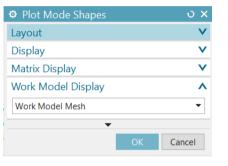

- Significantly improves animation performance for large models
- Displaying the work mode shapes on the test wireframe promotes understanding of the MAC results

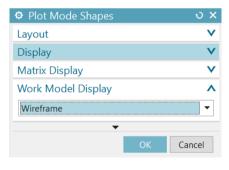

## **SIEMENS**

Ingenuity for life

# Simcenter 3D FE Model Correlation Enhancement: Automatic/Manual loading of mode shapes

## **Mode Shape Loading**

- By default, Modal Correlation and Model Update solutions load the Reference and Work mode shapes when the SIM file is opened
- New customer default prevents automatic loading
  - User manually selects with solution(s) for which shapes must be loaded

#### **Benefit**

 Reduces the time to open the SIM file for large models or with many Correlation and Model Update solutions

## Simcenter 3D FE Model Correlation

## **Enhancement: Automatic Pre-Test wireframe generation**

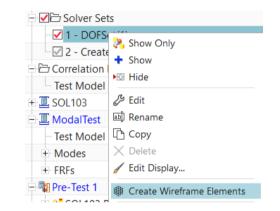

## SIEMENS Ingenuity for life

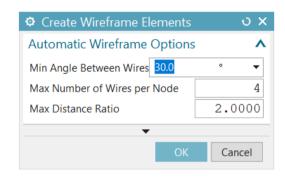

### **Pre-Test Wireframe Creation**

- Wireframes can be created using the following methods:
  - Automatic
  - Manual
  - Hybrid

### **Benefits**

- Automatic option provides significant time savings for the novice user
- Hybrid option provides efficient method of creating customized wireframes

Page 11 Siemens PLM Software

# Simcenter 3D FE Model Correlation Enhancement: Automatic face normal DOF selection

### **Automatic Detection of Face Normal**

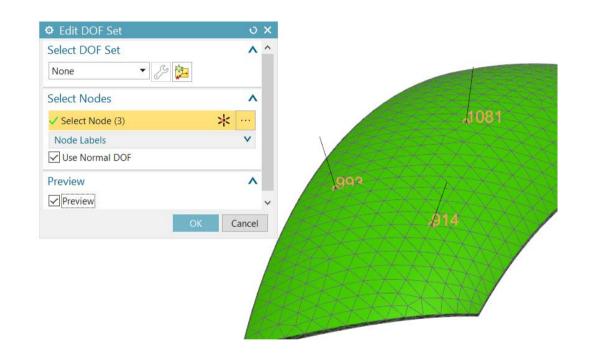

- Software automatically detects the normal direction for nodes on:
  - 2D meshes
  - Free faces of 3D meshes

#### **Face Normal Validation**

Arrow display

### **Benefits**

- Sensors are often installed normal to the test artcile face(s) by the Test Engineer
- Significant time savings compared to manual method of defining nodal coordinate system
- Instant visual feedback

Page 12 Siemens PLM Software

## Simcenter 3D FE Model Correlation

## **Enhancement: New Test Analysis Reference Solution**

## SIEMENS Ingenuity for life

## Test Analysis Reference Solution combines

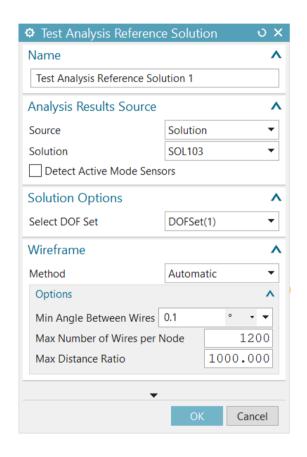

- Analysis mode shapes
  - Using local coordinate systems
  - At selected DOFs
- Wireframe
  - Manually or automatically generated

#### TARS created from either

- Pre-test Configuration
- DOF set

### **Benefits**

- Streamlined interface with Test
- Can be correlated with analysis work solution
  - Mode shape metrics evaluated at TARS DOFs

Page 13 Siemens PLM Software

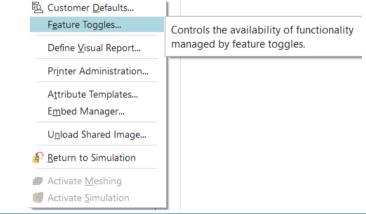

## Simcenter 3D FE Model Correlation Enhancement: Interface with Simcenter Testlab

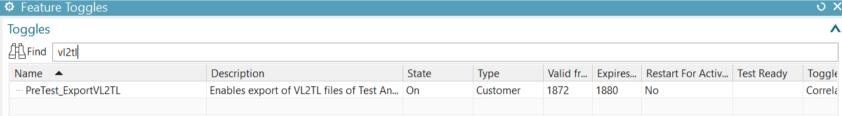

## **Test Analysis Reference Solution**

can be exported to Test in:

- UNV format
  - Baseline format
- VL2TL format
  - Hidden and undocumented in 2019.2
  - Can be enabled using new Feature Toggles

### **Benefits**

Streamlined interface with Test
